

NEW 2023

BBCURE

UV CURING SYSTEM

Smart protocol system

- System for update for the curing programs
- Web interface
- Feedback LOG for curing program and workflow

Compact and Powerful

The evolution of the Compact with more powerful LED mapping and an intelligent management system. Connecting with PC will make your work easy and orderly. You can create your favorite programs and send them to the BBcure which will always make them available on the display as well.

The BBcure will always give a report of the work done and will keep track of it that you can keep.

It manages infinite pre-installed programs and you can easily update it when new programs are available.

Everything will be simple for your work
